

VARONIS

DATADVANTAGE for Office 365

VARONIS DATADVANTAGE

for Office 365

Features and Benefits

VISIBILITY

- Complete visibility into the permissions structure of your data in Office 365 for SharePoint Online, Exchange Online, and OneDrive
- Displays data accessible to any user or group as well as users and groups with permissions to any folder - on premise or in the cloud
- User matching to match the active directory users with cloud users
- Identify folders that likely need a data owner or steward

DATA CLASSIFICATION

- Data classification for SharePoint Online and OneDrive information available with the IDU Classification Framework
- Find where sensitive data may be overexposed

DATA OWNERSHIP IDENTIFICATION AND INVOLVEMENT

- Automated and configurable reports involve data owners in the data governance process

AZURE ACTIVE DIRECTORY

- Azure Active Directory is supported as a new domain type

COMPREHENSIVE DATA GOVERNANCE IN THE CLOUD

Moving unstructured data to the cloud makes a lot of sense: but what about the permissions and security of your data? How do you make sure the right people have access to the right data in the cloud? Organizations lack the ability to see who is accessing data, and what they've done.

SOLUTION

Varonis makes the platform and applications that actualize data governance. DatAdvantage for Office 365 offers permissions visibility for Microsoft Exchange Online, SharePoint Online, OneDrive, and visibility into Active Directory for Azure – providing the data management, access, and security required to keep your data safe in the cloud
